

## Department of Fish and Game Comments on the December 1999 Summary of Changes Document

Comment Number	Final Response Code	Commentor	Comment/Concern	
			Impact Analysis - Chapter 1	
1	Page 1-6, Section 1.2	DFG	<p>Modify the second sentence of the recommended replacement paragraph as follows:</p> <p>“Additional specific information will be necessary for the subsequent decisions required during implementation over the next 30 or more years <del>the 25-30 year implementation period.</del>”</p>	
2	Page 1-6, Section 1.2	DFG	<p>Modify third to last sentence of recommended replacement paragraph as follows:</p> <p>“...that will restore ecological health and improve water management for beneficial use of the Bay-Delta system and meet <del>while meeting</del> the primary objectives of the Program.”</p>	
			Chapter 5.1 Water Supply and Water Management	
3	Subsection 5.1.2, page 5.1-3	DFG	<p>Modify the recommended additional paragraph as follows:</p> <p>“Although the ERP addresses ecological processes and stressors such as temperature and introduced species, controversy exists about whether or not implementation of the <del>over the probable effectiveness of ERP actions to in</del> combination with an effective Water Management Strategy, including an Environmental Water Account, will restore fisheries and simultaneously improve water supply reliability. <del>in an environment that may often be controlled by other system stressors.</del> It will be difficult to guarantee that measures taken to improve targeted fish population (such as the operations with the Environmental Water Account) will bring more certainty to water deliveries that no longer have the capacity to harm fisheries, when other stressors (such as increasing temperatures and introduced species) could adversely impact those same fish populations.”</p>
